Claim Interpretation

1. The examiner notes that the "when" clauses of the last six lines of claim 21, the last two lines of claim 22, and of claim 29, lines 10-15 are optional, i.e. the steps recited in these clauses are not required by the instant claims.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claim 21 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,428,744. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant claim and the '744 claims are directed to processes of sinter bonding an iron or copper based material to an iron-based backing. Particularly, claim 5 of the '744 patent recites this step. While the precise wording of instant claim 21 is substantially different than the '744 claims, both the present claim and the '744 claims appear to be directed to the same series of process steps, performed in the same order to the same effect in both instances. Thus, no patentable distinction is seen between the process of the '744 claims and that as defined in instant claim 21.
4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct

Art Unit: 1742

from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. In a response filed December 28, 2006, Applicant has amended the claims in a manner that clearly overcomes the previous rejections based on Myers or Yamada et al. Applicant further alleges that the instant claims can be distinguished from the claims of the '744 patent in that the patented claims do not teach a material that contains Al, Si, Co or Ni and have 10% or more Fe base alloy phase. The examiner respectfully disagrees, because claims 1, 2 and 4 of the '744 patent indicate that the material may contain Al or Si, and claim 3 of the '744 patent states that the balance of the material (i.e. the portion that is not copper or the other mentioned elements) is predominantly constituted by Fe.

6. Claims 29 and 30 are allowable over the prior art of record, and claims 22-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
